

Cotton Buds

General Product Description/Intended Purpose

Intended Purpose:

Cotton buds are non-invasive, non-sterile devices for cleaning and disinfection of skin and mouth, consist out of a formed cotton head and a stick made of polypropylene.

The product are suitable for oral and personal hygiene for the application of liquid substances (e.g. emulsions, ointments, disinfectants) on the ntact skin or mucosal membranes.

Cotton buds can be applied by lay person as well as healthcare professionals for transient use. The products are for single use only but a new device can be applied indefinitely

Cotton buds can be used in a home care environment and professional healthcare facilities.

Application/Indication

Cotton buds are indicated for cleaning and disinfection of skin and mouth.

Single use Device

Reusing a single-use medical device is dangerous. Reprocessing devices, in order to reuse them, may seriously damage their integrity and their performance. Information available on request. Reuse of the product could lead to microbiological contamination and/or mild infections of the skin.

Product disposal

To minimize the risk of potential infection hazards, or environmental pollution, disposable components of Cotton Buds should follow disposal procedures according to applicable and local laws, rules, regulations and infection prevention standards.

Incident Reporting

For a patient/user/third party in the European Union and in countries with identical regulatory regime (Regulation 2017/745/EU on Medical Devices); if, during the use of this device or as a result of its use, a serious incident has occurred, please report it to the manufacturer and/or its authorised representative and to your national authority.
