

HARTMANN Ideal Bandages

Spec.-No.: D 2.6745

Department: PMI - KOB

Date: 25.08.2017

1. General Product Description

HARTMANN Ideal Bandages are classic low-stretch bandage DIN 61632, loop selvedge, with textile elasticity of min. 90 %; may be boiled and sterilized; elasticity lost in wear is restored in washing the bandages.

HARTMANN Ideal Bandage carries the CE mark according to EU directive 93/42/EEC for medical devices. The product is classified as a class I medical device.

A conformity assessment has been performed for **HARTMANN Ideal Bandage** and it has been shown to be in compliance with all applicable requirements of the above mentioned directive.

The safe use of **HARTMANN Ideal Bandage**, therefore, is ensured if the product is used in line with the intended purpose.

2. Application / Indication

For light compression bandages in prophylaxis and follow-up treatment of venous disorders; for compressing dressing retention; for pre-, intra- and post-operative thrombosis prophylaxis; as a support and relief bandage when the skeletal and locomotor system is injured or as a sports bandage.
